# History

*More than 60 years supporting the bottling industries*

Cetie is a French non-profit association based in Paris. Cetie has been initially created in 1960, on the initiative of French glassmakers. It has been active in the fields of glass packaging only, until 1990.

The Cetie association, incorporated INE's library (Institut National de l'Embouteillage) in 1995, enabled it to expand its activities to the European level, but also to introduce subjects related to new technical materials in the bottling sector, in particular the creation of a PET group dedicated to the standardisation of finishes.

Since then, Cetie has not ceased to expand its network of experts, to complete its library of data sheets and guides and to extend the reputation of its documentation throughout the world.

Today, almost 3000 companies in 98 countries use our documents.

# Cetie 2022

*An association at the service of its members*

Cetie has 120 members (individual companies, groups or federations), leaders in the glass and PET packaging industry and in the sectors of food & beverages (wines, champagnes, beers, mineral waters, soft drinks, etc.), cosmetics (perfumes, body care products), pharmaceutical and household products.

Its staff is composed of three persons (Secretary-General, Documentation Manager and Communication Manager).

The association is managed by its Board of Directors composed of 20 members: FFL (FRENCH CORK FED.), CSVMF (FRENCH GLASS FED.), GUALA CLOSURES (IT), ELIPSO (FRENCH PLASTIC FED.), AROL (IT), O-I FR, SACMI (IT), FEVE (EUROPEAN GLASS FED.), AMCOR (FR), O-I(UK), VMV (GERMAN METAL FED.), BRITISH GLASS (UK), WARSTEINER (DE), COCA-COLA (BE), BV GLAS (GERMAN GLASS FED.), ARDAGH (NLD), SOLOCAP (FR), HUSKY (LUX), SELIG GROUP (FR), MOET & HENNESSY (FR).

[More Info](#)

# What we propose?

## *A community*

400 experts registered on the Extranet (member access) from the PET and glass sectors from AUSTRIA, BELGIUM, CZECH REPUBLIC, CHILE, FRANCE, GERMANY, GREECE, ITALY, LUXEMBURG, POLAND, PORTUGAL, RUSSIA, SPAIN, SWITZERLAND, UK, USA and more...

## *A framework*

The ultimate meeting place for all stakeholders in the bottling industry in the food & beverages, cosmetics and pharmaceutical sectors: brand owners/bottlers, packaging and closure systems, bottling machines and control and inspection systems manufacturers.

## *Know-how common base*

Patrimonialization of know-how allows the basis of a common language favouring exchanges on an international scale. Cetie is an atypical instrument at the service of its members, supporting them in their objectives of transmission, training, communication and consequently development.

# Access to our documentation

*cetie.org is the key to safety and know-how*

More than 200 documents are freely available on our website [www.cetie.org](http://www.cetie.org). These are regularly revised (according to market developments), and many new sheets are also created every year by our working groups according to the expectations of the interprofessional fields. They accompany stakeholders in disputes, purchases, training, audits, etc. They are THE key to a common language and guarantee the safety of products placed on the market. They are also a heritage of know-how from my best experts and consultants in the bottling fields.

## *Technical data- sheets*

Neck finishes geometry,  
tolerances,  
recommendations,  
nomenclature

## *Best practices guides*

Quality guidelines,  
bottling guides,  
labelling guide

## *Technical FAQ*

Questions / Answers to  
experts for glass and  
PET packaging

## *Glossaries*

Key terms, defects,  
translation, and a  
royalty-free image-  
bank

## *Discussions*

within the working groups

CETIE member organisations submit their topics to the working groups. Decisions are taken on a consensual basis: a new topic can initiate creation of a new group or sub-group. The CETIE evolves cyclically according to the requests of its members. In recent years, the working groups do not necessarily decide to submit their documents to the official standardisation bodies. Publication of documents and access to them remains the decision of the members.

# Current

# topics

Neck finishes standardisation, the definition of the packaging/capping system, end of life of the article, decoration-labelling inspection, etc.

You are invited to

# Suggest your topic

*To the working groups*

Cetie remains an open door to all the issues of the bottling industry. Whether they are mentioned in our document base or not, all the feedback you suggest is taken into account, and we keep you informed.

You are invited to

# SHARE *with COLLEAGUES*

[www.cetie.org](http://www.cetie.org)

Quality, R&D and Production departments are concerned by the creation of technical data sheets: do not hesitate to give us feedback on the online content of the document base.

We encourage you to share this presentation with your colleagues: opening accounts to download documents is free. French Intellectual Property law requires any user of a document to obtain permission from Cetie for any reproduction of a Cetie document: we, therefore, encourage you to contact us in order to open the requested user-accounts.

# More about us?

The Cetie homepage provides a FAQ gathering key questions generally asked to Cetie staff.  
Do not hesitate to refer to this precious resources!

# Follow-up

Publications, news and more

Find out more about Cetie's activities :

Stay informed about new documents, reviews, etc. on the LinkedIn page.

If you are registered on our Website, you will receive our Newsletters (5 to 6 per year): Articles, group activities & discussions, new documents being created, revised or enquired.

An online chat module on [cetie.org](http://cetie.org) allows you to keep in touch with us for all your questions.
